EDUCATION

Rutgers University

Computer Science B.S., Business Administration Minor

New Brunswick, NJ

Sept. 2022 – December 2026

EXPERIENCE

Expert Tutor

Oct. 2022 – Present

Schoolhouse.world

Remote

- Tutor and correspond on academic subjects including Algebra, Pre-Calculus, Computer Science.
- Lead SAT boot camps in order to aid in increasing students' SAT scores as well as building proficiency in related topics.
- Attained tutor certification in Pre-Algebra, Algebra 1&2, College Algebra, Pre-Calculus, SAT Math/English.

Student Intern Researcher

May 2023 – July 2023

I.D.E.A. (Innovation Design Entrepreneurship Agency) at Rutgers University

New Brunswick, NJ

- Managed a partnership project with Ribbit Network, a non-profit dedicated to GHG (greenhouse gas) tracking, in building and deploying 3D printed CO2 monitor sensors.
- Compiled and trouble-shooted software for the CO2 sensor to track relevant data.
- Interpreted results from sensors through data visualization and analysis using Python and R.
- Summarized key findings in web page dashboard (developed with CSS, HTML, JavaScript).

Software/Backend/Security Engineer

May 2025 – October 2025

Universal Selfcare

Remote/NY

- Built and hardened patient portal APIs on Google Cloud (Cloud Run/GKE), enforcing JWT auth and MFA for provider accounts.
- Implemented automated backups and verification scripts using gsutil.
- Performed security testing (nmap scans, EICAR endpoint tests, brute-force simulations) and remediated findings with firewall and IAM changes.
- Configured Cloud Monitoring/Logging dashboards and alerts for PHI access, CrashLoopBackOff, and anomalous file downloads.

LEADERSHIP

UI/UX Designer

Jan. 2024 – Present

R.U. S.L.U.G. (Rutgers University Student Linux Users Group)

Busch Campus; Piscataway, NJ

- Design promotional material for all events and social media posts.
- Use Figma to design the UI for the Signboard Project (E-Ink Rutgers Bus tracker).
- Perform E-Board duties including event planning and project coordination with other organizations.

PROJECTS

Clippity | *Python, Bash, sxhkd, RegEx, LLM, dmenu*

- Implemented an easy to use text manipulation key-bind API.
- Utilized dmenu for text prompt entry with LLM support.
- Carried out key-binds using pbcopy/pbpaste to error check small to mid size text samples.
- Implemented LLM support using Python for text paraphrasing.

KindOfLike | *MongoDB, HuggingFace Transformers, Python*

- Developing a recommendation system for books and movies using semantic search.
- Scraped GoodReads and IMDB for titles, reviews, and synopses.
- Used HuggingFace Transformers and the all-MiniLM-L6-v2 model to create embeddings stored and queried from a MongoDB vector database.

zipgig | *Python, FastAPI, React, MongoDB*

- Created FARM stack web app to help users find one day jobs and gigs.
- Designed frontend with Figma, then implemented with React and Jinja templates.
- Used FastAPI webserver, hosted locally, with MongoDB to ensure fast and reliable content delivery.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, C#, JavaScript, HTML/CSS, R, LaTeX

Developer Tools: Git, Vim, VS Code, Bootstrap, REST API, Spring Boot

Graphic/Web Design: Adobe Suite, Canva, Figma

Project Management: Excel, Kanban, ClickUp, Agile, Tableau
